

Single Guinea Fowl wet fly

Materials List

Hook - size 10 or 12 wet fly

Thread - size 6.0 (any color you want)

Body - size 6.0 (any color you want)

Tying Instructions

Starting near the bend of the hook, tie in the Guinea feather by the tip. Then using a hackle tool, wrap the feather forward. As the feather progresses up the hook, you'll see the feather start to flare out naturally. Tie off before the hook eye and whip finish. A touch of head cement is recommended.
